

## 7006ci MFP / 8006ci MFP

# A reliable partner that prints well under pressure.

In this day and age, the demands on extensive colour printouts are increasing to ever higher levels. We've understood these requirements and developed two A3 multifunctional systems that meet these challenges effortlessly. Not only do these systems offer a print resolution of up to 1,200 dpi and a new toner for more brilliant colours and saturation; they are also unrivalled when it comes to user-friendliness, productivity, reliability and functionality. They can print, copy and scan at great speed while achieving an outstanding level of energy efficiency. Interested? Then why not get to know them?

### What you can expect:

**Colour at its finest:** The new systems print at a high resolution of up to 1,200 dpi. This makes your photos and logos look even more professional – and that's with the standard settings. But even this can be improved thanks to the versatile printer driver with its intuitive tools. The colour optimiser allows logos (among other things) to be adjusted to your corporate design. With the optional Fiery Controller, you can climb the heights of this Olympus of colour and print management – if you're keen to reach the top.

**High speed:** You don't have to wait long, even when printing high-volume colour prints. The 8006ci, for example, can output up to 70 A4 or 35 A3 pages per minute in colour. And scanning – with a maximum of 220 image pages per minute for duplex, b/w templates – is now faster than ever before. This way, you gain important time for other things.

**Large print volume:** With a total paper capacity of 7,650 sheets\* from up to eight paper feeds\*, these MFPs offer an impressive level of flexibility. For example, they allow you to process different types of paper in a single job. This means there's nothing to prevent you from creating brilliant presentations, employee magazines or company brochures at great speed. The systems can also process A3 large format (305 x 457 mm), various paper weights of up to 300 g/m<sup>2</sup> and banner paper. Dispatch-ready brochures\* or letters with tri-folding\* are produced easily in a single operation. Both systems also offer new SoftSlide cassettes for quiet paper loading.

**Very adaptable:** The touch display with a picture diagonal of 22.86 cm, the HyPAS interface, special Solution Packs\* and other optional software solutions, make it easy to adapt the systems to your requirements. The systems also feature convenient job memory functions that allow you to call recurring jobs directly from the respective system's memory. If required, these functions can be password-protected so that nothing ends up in the wrong hands. This password protection is also used for Follow-Me-Printing\* – if the system you require is occupied, simply print on another system.
